#### Text of Legislative File 21-1588

Consider a motion to approve Pay Request #3 in the amount of \$16,975.09 to Casper Construction for the Solar Plus Storage Grading Project.

#### **Background Information:**

The total contract amount is \$337,594.00. This is a unit price contract and page 3 of the pay request shows the status of the items completed in pay request #3. This pay request includes additional turf establishment items for seed, erosion control, and hydraulic reinforce fiber matrix for a total of \$10,005.00 with an additional payment for reduction in retainage requested by GRPU for \$6970.09. With the recent freezing conditions, we are discussing options with the contractor for completing the grading, seeding, and erosion

control work. An update will be given during the electric department report at the Commission meeting.

#### **Requested Commission Action:**

Consider a motion to approve Pay Request #3 in the amount of \$16,975.09 to Casper Construction for the Solar Plus Storage Grading Project.

#### Text of Legislative File 21-1605

Consider a motion to confirm the hire of the selection committee's preferred applicant, Ms. Jean Lane, for the Business Services Manager position contingent upon satisfactory results of the pre-employment background screenings.

#### **Background Information:**

The requested action is part of our succession plan for the upcoming retirement of Tyanne Betts, our current Finance and Accounting Manager. Tyanne will be retiring from full-time

employment in 2021. It is desired to hire Tyanne's replacement soon so as to train and transition throughout the audit process. At the November 18, 2020 meeting the Commission approved the updated position description and authorized the advertising for the Business Services Manager. Following advertising of the position opening, we collected six applications. The applications were then rated and President Stanley and General Manager Kennedy conducted an in-person interview on December 21. Background verification was submitted and an offer of employment was made to the selection committee's preferred applicant, Ms. Jean Lane of Grand Rapids. She accepted our offer of employment and will begin work with us in February contingent upon satisfactory results of the pre-employment background screenings.

#### **Requested Commission Action:**

Consider a motion to confirm the hire of the selection committee's preferred applicant, Ms. Jean Lane, for the Business Services Manager position contingent upon satisfactory results of the pre-employment background screenings.

File Number: 21-1607

# GRAND RAPIDS PUBLIC UTILITIES SURPLUS EQUIPMENT SALE

Grand Rapids Public Utilities will sell used surplus non-AMI Electric Meters by sealed bid at the GRPU Service Center, 500 SE 4th Street, Grand Rapids, MN. Items will be available for inspection Thursday, January 14th through Thursday, January 21, 2021 between the hours of 9:00 AM – 4:00 PM. Items are being sold as-is, with no warranty or guarantee. Bid forms will be received until 9:00 AM on Friday, January 22, 2021 at which time they will be publicly opened and read aloud. Successful bidders will be notified by phone if not present. The expense to remove the bid item(s) and the liability in moving the same is the sole responsibility of the successful bidder. Unless special arrangements are made, The Buyer shall arrange for a mutually convenient pick up time between the hours of 9:00 AM to 4:00 PM from Monday, February 1st through Friday, February 5th, 2021. The Buyer must remove bid items from the Grand Rapids Public Utilities warehouse by 4:00 PM on Friday, February 5th. Grand Rapids Public Utilities reserves the right to reject any or all bids or award upon such basis as they may deem to be in the utility's best interest.

# **GRPU SURPLUS EQUIPMENT BID FORM**

ITEMS: Surplus Non-AMI Electric Meter Sale – January 2021

**Grand Rapids, MN 55744** 

	Total Amount of Bid \$
BIDS TO BE OPENE	D: 9:00 a.m. on Friday, January 2021
	Julie Kennedy, General Manager Grand Rapids Public Utilities 500 SE 4th Street

The Bidder proposes and agrees, if this Bid is accepted, to enter into the Agreement with Owner to perform all work as indicated for the price above and in accordance with the terms and conditions of the Agreement.

#### **AGREEMENT**

This Agreement is entered into as of	(the "Effective Date") by the
Grand Rapids Public Utilities Commission located at 500 SE	4th Street, Grand Rapids, MN
55744 ("Seller") and	, located at
	, ("Buyer").

Seller and Buyer may be referred to in this Agreement collectively as the "Parties."

The Parties agree as follows:

**Sale of Property**. Seller agrees to sell and Buyer agrees to purchase the personal property described below (the "Property"): **Approximately 500 non-AMI electric meters**.

**Guarantee Waiver**. All property is offered for sale "**as-is**, **where-is**." The surplus meters are various sizes and makes and will be sold as one complete lot. Seller expressly disclaims any representations or warranties as to the value, condition, or functionality of the Property or its suitability for any particular purpose and Buyer will have no recourse against Seller for the Property. The Buyer is not entitled to any payment for loss of profit or any other money damages - special, direct, indirect, or consequential. Seller represents and warrants that they have good and marketable title to the Property and full authority to sell the Property. Seller also

represents that the Property is sold free and clear of all liens, indebtedness, or liabilities. Buyer may request a Bill of Sale from the Seller for the Property.

**Description Warranty**. Seller warrants to the Buyer that the property offered for sale will conform to its description. Any claim for mis-description must be made prior to removal of the property. If the Seller confirms that the property does not conform to the description, the Seller will keep the property and refund any money paid. The liability of the Seller shall not exceed the actual purchase price of the property. Please note that upon removal of the property, **all sales are final.** 

**Inspection**. Bidders may inspect the meters from Thursday, January 14th through Thursday, January 21st, 2021 between the hours of 9:00 AM – 4:00 PM.

**Taxes**. The Buyer will be responsible for filing all required sales and use tax returns in connection with the transfer of the Property. Buyer will also pay all required sales and use taxes and any other transfer costs and expenses that arise as a result of the transfer of the Property. Buyer will pay all such personal property taxes that accrue thereafter.

**Consideration of Bid**. Seller reserves the right to reject any and all bids and to withdraw from sale any of the items listed.

**Payment**. Payment must be received prior to pick up of property. Payment shall be made in the form of a money order or cashier's check made out to Seller. There will be NO partial payments allowed. Property must be paid in full per payment process prior to pick up.

**Pick Up Procedure**. The Buyer shall arrange for a mutually convenient pick up time between the hours of 9:00 AM to 4:00 PM from Monday, February 1st through Friday, February 5th, 2021. The Buyer must remove bid items from the Grand Rapids Public Utilities warehouse by 4:00 PM on Friday, February 5th. If the Buyer, fails to remove the property within the specified time, the Seller reserves the right (1) to award the bid to the next highest bidder; and (2) to dispose of the item as deemed desirable by the Seller.

Successful bidder is responsible for removal of all property awarded to them from its location at the Grand Rapids Public Utilities Warehouse located at 500 SE 4th Street, Grand Rapids, MN 55744. The Buyer will make all arrangements and perform all work necessary, including providing satisfactory equipment to haul and transport the property. Under no circumstances will Seller assume responsibility for damage to the property or the hauling equipment.

**Default**. Default shall include (1) failure to observe these terms and conditions; (2) failure to make good and timely payment; or (3) failure to remove all items within the specified time. Default may result in termination of the contract and suspension from participation in all future sales until the default has been cured. If the Buyer fails in the performance of their obligations, Seller may exercise such rights and may pursue such remedies as are provided by law.

Acceptance of Terms and Conditions. By submitting a bid, the bidder agrees that they have read, fully understand and accept these Terms and Conditions stated herein, and agree to pay for and remove the property, if the bid is accepted, by the dates and times specified. This Agreement shall be binding upon the Parties and their respective heirs, successors and assigns. The provisions of this Agreement are severable. If any provision is held to be invalid or unenforceable, it shall not affect the validity or enforceability of any other provision. The section headings are for reference purposes only and shall not otherwise affect the meaning, construction or interpretation of any provision of this Agreement. This Agreement constitutes the entire agreement between the Parties and supersedes any and all prior oral or written agreements or understandings between the Parties concerning the subject matter of this Agreement. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original and all of which together shall constitute one and the same document.

**Governing Law**. This Agreement shall be governed by and construed in accordance with the laws of the State of Minnesota without giving effect to the conflict of laws principles thereof.

**Disputes**. Any dispute arising from this Agreement shall be resolved through mediation. If the dispute cannot be resolved through mediation, then the dispute will be resolved through binding arbitration conducted in accordance with the rules of the American Arbitration Association.

#### Text of Legislative File 21-1597

Consider a motion to approve the purchase of four lift station Alarm Agents from NOS Automation for the Lift Station Radio Upgrades capital project in the amount of \$9,626.65.

#### **Background Information:**

This is a budgeted expense through the approved 2021 Lift Station Radio Upgrades capital project. To date, we have spent \$0 of the approved \$13,890 capital budget. Two quotes were received. One from NOS Automation for \$9,626.65 (attached) and one

from Tank Vitals for \$10,512 (attached).

The installation of the Alarm Agents will be in first quarter of 2021.

We recommend approval of the NOS Automation quote for the Alarm Agents.

## **Requested Commission Action:**

Consider a motion to approve the purchase of four lift station Alarm Agents from NOS Automation for the Lift Station Radio Upgrades capital project in the amount of \$9,626.65.

Description

Total Project Cost: \$32,890

The communication radio used in the lift stations have been discontinued. Improved technology exists that will better suit the utility today and into the future via cellular based alarms.

## Justification

The communication radio used in the lift stations have been discontinued. The parts are not available. This is essential to ensure the proper operation of the collection system. Failure to address an overflowing lift station would result in fines and public health concerns.

Expenditures		2020	2021	2022	2023	2024	Total
Purchases		19,000	9,500				28,500
Labor			4,390				4,390
	Total	19,000	13,890				32,890
~							
Funding Sources		2020	2021	2022	2023	2024	Total
Rplcmt Fund-WWC Infrastructure		19,000	13,890				32,890
	Total	19,000	13,890				32,890

## **Budget Impact/Other**

12 lift stations effected. (2-9, 11-13, 15)

Alarm Agent \$2375 each

labor 2 hrs @ 145 \$/hr each

Year 1

(8) units = \$19,000

Year 2

(4) units = \$9,500

Labor (for all) = \$3480

Contingency 0.07 = \$910

<b>Budget Items</b>		2020	2021	2022	2023	2024	Total
Capital Projects		19,000	13,890				32,890
	Total	19,000	13,890				32,890

Proposal No.: Q202012001.0

Subject: Lift Station Remote Alarm Agents

Mr. Mattson,

I appreciate the opportunity to present GRPUC (Grand Rapids Public Utilities Commission) with this proposal to provide four AlarmAgent units for remote monitoring and alerting of lift station events or other similar applications.

#### 1.0 Scope

The scope of this proposal is for NOS Automation to provide the follow hardware.

- 4 AlarmAgent Digital WRTU with NEMA 4X Enclosure and Phantom antenna
- 4 AlarmAgent 120 VAC to 12VDC Power Supply
- 4 Cabinet Mount Digital RM3 N antenna with 36" cable
- 4 Cloud Based Management Service for each unit \$360/unit/yr
  - \*\*\*Note this service requires annual renewal

#### 2.0 Clarifications

Additional proposal clarifications

• Hardware mounting and wiring will be done by the city electrician

#### 3.0 Terms

- Invoicing for half the hardware cost will be submitted upon acceptance of this proposal with the balance due upon delivery
- Any setup services for the hardware will be invoiced on a time and material basis
- This proposal pricing is valid for 60 days

## 4.0 Pricing

Individual components priced for clarifications; removal of any individual component from the scope of this proposal may impact pricing of other components.

Lump Sum Total: \$9,626.65

Sincerely,

Richard Beckrich

Automation Specialist / Owner NOS Automation LLC21419 River Rd

Grand Rapids, MN 55744

## S2C External

Supervisory Control and Data Acquisition (SCADA) to Cellular

#### \$2,598.00 + \$300.00 yearly Cellular fee

This S2C External Station unit will collect data, check temperatures and monifor alarms, then send the updated data to the Cloud for you to view from anywhere in the world.

Real-time alarm and notifications sent directly to your phone and/or eMail address to reduce the risk of severe damage

DIVISION: PUBLIC SERVICES

SKU: 820

Call (701) 352-4696 and Place Your Order

## DESCRIPTION

DATA SHEET

#### Cellular Interface

- . USA: AT&T, Verizon
- · Canada: Bell Canada, Rogers (+ \$380 yearly Canada Cellular fee)
- · Includes VPN (virtual private network) Protection
- Fee is Billed April 1st of this year to April 1 of next year
- 1st year fee is pro rated from install date to April 1st of next year

#### Features

- · Requires 120 Vac
- · Up to 10 Input Ports \*each timer removes 1 Input port
- Up to 4 Run Timers \*each timer removes 1 Input port
- 4 Relay Controls
- RS485 Communication Connection Port
- Optional Add-on 4-2mA and/or 0-10V control board
- Temperature Sensor -40°F to 149°F (-40°C to 65°C)
- Solid State battery backup \*never needs replacing

Unit	Price	Quantity	Subtotal	
S2C External	\$2,598.00	4	\$ 10,392.00	
			\$ 10,392.00	Subtotal
				Sales Tax
			\$ 120.00	Shipping
			\$ 10,512.00	Total
* Note Installa	ition require			

<sup>\*\*</sup> Note Cellular fee is separate and required annually per unit

#### Text of Legislative File 21-1586

Consider a motion to approve the 2021 Minnesota Pay Equity Compliance Report and authorize signature and filing the report with the Minnesota Office of Budget and Management.

## Background Information:

Local Government Pay Equity Act, M.S. 471.991 - 471.999 and Minnesota Rules, Chapter

3920 requires the Grand Rapids Public Utilities Commission (GRPUC) to submit a pay equity report to the State of Minnesota, Office of Management & Budget every three years. GRPUC is required to submit a report by January 31, 2021 based on pay data as of December 31, 2020. Attached to this item please find a copy of said report as well as a Guide to Understanding Pay Equity document for your review. The report indicates that the GRPUC is in compliance with Minnesota State Statutes.

## Requested Commission Action:

Consider a motion to approve the 2021 Minnesota Pay Equity Compliance Report and authorize signature and filing the report with the Minnesota Office of Budget and Management.

Posting date:
Jurisdiction Name:
NOTICE TO POST
2021 Pay Equity Report
This jurisdiction is submitting a pay equity implementation report to Minnesota Management & Budget as required by the Local Government Pay Equity Act, Minnesota Statutes 471.991 to 471.999. The report must be submitted by January 31, 2021.
The report is public data under the Minnesota Government Data Practices Act, Minnesota Statutes, Chapter 13 That means that the report is available to anyone requesting this information.
This notice is being sent to all union representatives (if any) in this jurisdiction. In addition, this notice must remain posted in a prominent location for at least 90 days from the date the report was submitted.
For more information about this jurisdiction's pay equity program, or to request a copy of the implementation report, please contact:
(local contact person's name, address, telephone)

For more information about the state pay equity law, you may contact the Pay Equity Office at:

pay.equity@state.mn.us

#### **Part B: Official Verification**

 The job evaluation system used measured skill, effort responsibility and working conditions and the same system was used for all classes of employees.

The system used was:

Consultant's System (specify) ✓

Describe below if the job evaluation system used is: "The same as last year", "A new system", "A substantially modified system from last year", or another descriptor not listed here:

(\*less than 240 characters)

Hay Management Consultants

2. Health Insurance benefits for male and female classes of comparable value have been evaluated and

There is no difference  $\checkmark$  and female classes are not at a disadvantage.

#### **Part C: Total Payroll**

2,768,222.12 is the annual payroll for the calendar year just ended December 31.

**3.** An official notice has been posted at:

Grand Rapids Public Utilities Work Sites
(prominent location) (\*less than 60 characters)

Jurisdiction Type: UTL - Utility

informing employees that the Pay equity Implementation Report has been filed and is available to employees upon request. A copy of the notice has been sent to each exclusive representative, if any, and also to the public library.

The report was approved by:

Grand Rapids Public Utilities Commission

(governing body) (\*less than 60 characters)

Thomas G. Stanley

(chief elected official)(\*less than 60 characters)

President

(title) (\*less than 60 characters)

- Checking this box indicates the following:
  - signature of chief elected official
    - approval by governing body
    - all information is complete and accurate, and
    - all employees over which the jurisdiction has final budgetary authority are included

Grand Rapids, MN 55744

Contact: Julie Kennedy Phone: (218) 326-7687 E-Mail: jakennedy@grpuc.org

The statistical analysis, salary range and exceptional service pay test results are shown below. Part I is general information from your pay equity report data. Parts II, III and IV give you the test results.

For more detail on each test, refer to the Guide to Pay Equity Compliance and Computer Reports.

#### I. GENERAL JOB CLASS INFORMATION

	Male Classes	Female Classes	Balanced Classes	All Job Classes
# Job Classes	20	7	0	27
# Employees	26	11	0	37
Avg. Max Monthly Pay per employee	5716.47	5639.21		5693.50

#### II. STATISTICAL ANALYSIS TEST

## A. Underpayment Ratio = 70 \*

	Male Classes	Female Classes
a. # At or above Predicted Pay	10	2
b. # Below Predicted Pay	10	5
c. TOTAL	20	7
d. % Below Predicted Pay (b divided by c = d)	50.00	71.43

<sup>\*(</sup>Result is % of male classes below predicted pay divided by % of female classes below predicted pay.)

#### **B. T-test Results**

Degrees of Freedom (DF) = 35	Value of T = 1.126

a. Avg. diff. in pay from predicted pay for male jobs = 12

#### III. SALARY RANGE TEST = 150.00 (Result is A divided by B)

A. Avg. # of years to max salary for male jobs = 3.00

B. Avg. # of years to max salary for female jobs = 2.00

## IV. EXCEPTIONAL SERVICE PAY TEST = 204.08 (Result is B divided by A)

A. % of male classes receiving ESP = 35.00 \*

B. % of female classes receiving ESP = 71.43

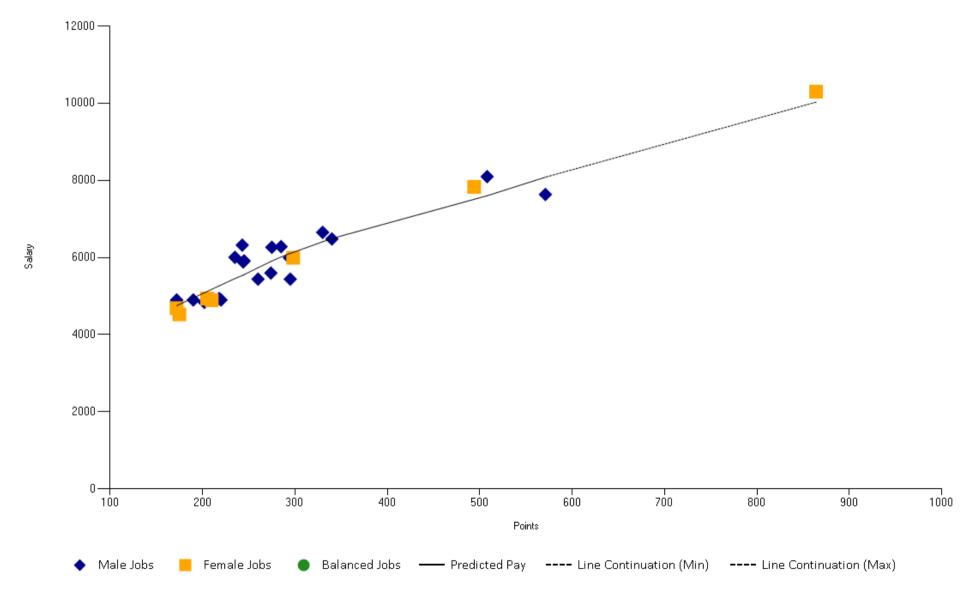

\*(If 20% or less, test result will be 0.00)

b. Avg. diff. in pay from predicted pay for female jobs = -120

Guide to Understanding Pay Equity Compliance	1
Tests for Compliance	
Compliance Report	3
Statistical Analysis	6
Method Used for Predicted Pay Calculation	8
Alternative Analysis Test	12
Salary Range Test	16
Excentional Service Pay Test	17

## **Guide to Understanding Pay Equity Compliance**

This booklet gives a general overview of how data from the local government reports is analyzed and how the tests for compliance are conducted. Complete details of compliance requirements are in Minnesota Rules Chapter 3920.

This booklet also describes the computer software developed by MMB. This software calculates several of the tests for compliance and the reports produced by the software are explained on pages three through five.

## **Tests for Compliance**

- 1. Completeness and Accuracy Test determines whether jurisdictions have filed reports on time, included correct data and supplied all required information.
- 2. Statistical Analysis Test described on pages three through five, compares salary data to determine if female classes are paid consistently below male classes of comparable work value (job points). MMB has developed software that calculates the results for this test. This test is generally applied to larger jurisdictions. For smaller jurisdictions, the alternative analysis is used.
- 3. Alternative Analysis Test described on pages 14 through 17, compares salary data to determine if female classes are paid below male classes even though the female classes have similar or greater work value (job points). The software is not used for this test.
- 4. Salary Range Test described on page 18, compares the average number of years it takes for individuals to move through salary ranges established for female classes compared to male classes. This test only applies to jurisdictions that have a system where there is an established number of years to move through salary ranges.
- 5. Exceptional Service Pay Test described on page 19, compares how often individuals in male classes receive longevity or performance pay above the normal salary range compared to how often individuals in female classes receive this type of pay. This test applies only to jurisdictions that have a system that includes exceptional service pay.

# **Determining Whether the Alternative or Statistical Analysis Will Be Used**

#### 1. Alternative analysis - jurisdiction has:

• Three or fewer male classes.

NOTE: Jurisdictions with three or fewer male classes may want to skip over the information on pages two through seven describing the statistical analysis and computer reports.

## 2. Statistical analysis - jurisdiction has:

- Six or more male classes and at least one class with an established salary range, or
- Four or five male classes and an underpayment ratio of 80% or more. May or may not have classes with an established salary range.
- 3. Start in statistical analysis but go to alternative analysis jurisdiction has:
  - Four or five male classes and an underpayment ratio below 80%, or
  - An underpayment ratio below 80%, six or more male classes, but no classes with a salary range.

## **Explanation of Computer Reports**

Information contained in the next few pages is intended to explain the three reports produced by the Pay Equity Management System Software. Look at the sample reports as you read the following explanations. Each numbered explanation corresponds to a shaded number on the examples on pages three, five and six. For informational purposes, a sample of a graph produced with the Pay Equity Analysis software is shown on page seven.

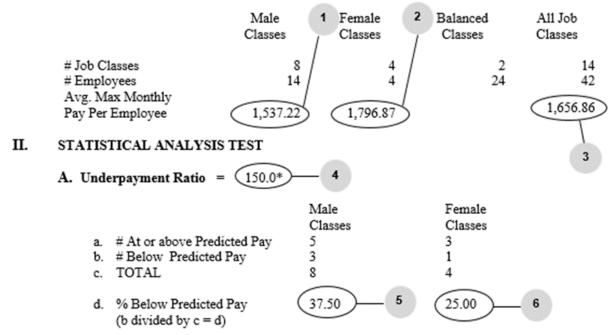

## **Compliance Report**

The statistical analysis, salary range and exceptional service pay test results are shown below. Part I is general information from the

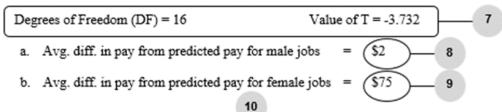

Pay Equity Implementation Report data. Parts II, III and IV of the Compliance Report give test results. For more detail on each test, refer to Minnesota Rules Chapter 3920.

## I. GENERAL JOB CLASS INFORMATION

<sup>\*(</sup>Result is % of male classes below predicted pay divided by % of female classes below predicted pay.)

#### B. T-test Results

III. SALARY RANGE TEST = 105.71% (Result is A divided by B)

- A. Avg. # of years to max salary for male jobs = 5.29
- B. Avg. # of years to max salary for female jobs = 5.00

- A. % of male classes receiving ESP 50.00\*
- B. % of female classes receiving ESP 25.00 \*(If 20% or less, test result will be 0.00.)

## **Compliance Report**

Explanations below correspond to shaded numbers on page three.

- 1. Average Maximum Monthly Salary for Employees in Male Classes
- 2. Average Maximum Monthly Salary for Employees in Female Classes
- 3. Overall Average Maximum Monthly Salary for an Employee
- 4. Underpayment Ratio

The minimum requirement to pass the statistical analysis test is an underpayment ratio of 80%. The underpayment ratio is calculated by dividing the percentage of male classes below predicted pay (item five) by the percentage of female classes below predicted pay (item six). In the example on page three,  $37.5 \div 25 = 150\%$ . Jurisdictions with an underpayment ratio below 80% can improve their score by increasing salaries for female classes to at or above predicted pay. More details regarding predicted pay are on pages six through 13.

If the underpayment ratio is less than 80%, a jurisdiction may still pass the statistical analysis test if the t-test results (explained in item 7) are not statistically significant. The t-test measures the average dollar difference from predicted pay for male and female classes.

# 5. Percentage of Male Classes Below Predicted Pay

This percentage is calculated by dividing the number of male classes below predicted pay by the overall total of male classes. In the example on page three, the total of male classes is eight, and three fall below predicted pay. Therefore,  $3 \div 8 = 37.50\%$ .

# 6. Percentage of Female Classes Below Predicted Pay

This percentage is calculated by dividing the number of female classes below predicted pay by the overall total of female classes. In the example on page three, the total of female classes is four and one of those falls below predicted pay. Therefore,  $1 \div 4 = 25\%$ .

## 7. T-Test & Degrees of Freedom

These numbers are used only for jurisdictions with an underpayment ratio below 80%, at least six male classes and at least one class with a salary range. If the underpayment ratio is 80% or more, these numbers are not used nor are they used for jurisdictions in the alternative analysis.

These numbers show the average dollar amount that males and females are from predicted pay and answer the question: Are females paid less than males on average and, is the underpayment of females statistically significant?

To determine if these numbers show statistical significance, they must be checked against the table on page five. Find the DF number in the "Degrees of Freedom" column and then look across for the "Value of T." If the "value of t" on the compliance report is less than the "value of t" on the table, it means that either there is no underpayment of female classes or that the underpayment is not statistically significant. If the t-test number is the same or more than the "value of t" on the table, the underpayment for female classes is statistically significant and the jurisdiction would not pass the test.

Salary increases for female classes sufficient to eliminate statistical significance would allow a jurisdiction to pass the statistical analysis test even with an underpayment ratio below 80%.

In the example on page three, t-test results would not be used because the underpayment ratio is above 80%, but let's assume we needed to check these results. First, we would find 16 in the DF column

and then look across to find the value of t at 1.746. Since our t-test number is -3.732, well below the value of t on the table, these results would show that on average, females are not underpaid compared to males.

	T-Test Table (5% Significance)							
<u>DF</u>	Value of t	<u>DF</u>	Value of t	<u>DF</u>	Value of t			
1	6.314	12	1.782	23	1.714			
2	2.920	13	1.771	24	1.711			
3	2.353	14	1.761	25	1.708			
4	2.132	15	1.753	26	1.706			
5	2.015	16	1.746	27	1.703			
6	1.943	17	1.740	28	1.701			
7	1.895	18	1.734	29	1.699			
8	1.860	19	1.729	30	1.697			
9	1.833	20	1.725	40	1.684			
10	1.812	21	1.721	60	1.671			
11	1.796	22	1.717	120	1.658			
				Infinity	1.645			

While the entire method for calculating t-test results cannot be explained here, it is a commonly accepted mathematical technique for measuring statistical significance. The formula is fairly complex, but basically it factors in predicted pay, the dollar difference from predicted pay and the number of employees. The DF number is the total number of employees in male or female dominated classes only, minus two.

# 8. Average Dollar Amount Male Classes are Above or Below Predicted Pay

In the example on page three, the maximum monthly salary for male classes, on average, is \$2 above predicted pay.

# 9. Average Dollar Amount Female Classes are Above or Below Predicted Pay

In the example on page three, the maximum monthly salary for female classes, on average, is \$75 above predicted pay.

## 10. Salary Range Test

This number must be either 0% or 80% or more to pass this test. In the example on page three, 105.71% is passing.

Jurisdictions not passing this test can pass it

by reducing the number of years it takes for female classes to reach maximum salaries, increasing the number of years for males to reach maximum salaries, or some combination of both. A result of 0% would mean that either there are no male classes with an established number of years to move through a salary range, no female classes with an established number of years to move through a salary range, or both. A description of how the salary range test is calculated is on page 18.

## 11. Exceptional Service Pay Test

This number must be either 0% or 80% or more to pass this test. In the example on page three, 50% is not passing. Jurisdictions not passing this test can pass it by either increasing the number of female classes that receive exceptional service pay, decreasing the number of male classes that receive exceptional service pay, or some combination of both. A result of 0% could mean that fewer than 20% of male classes receive exceptional service pay or that no female classes receive exceptional service pay. A description of how the exceptional service pay test is calculated is on page 19.

## **Statistical Analysis**

Explanations correspond to shaded numbers below.

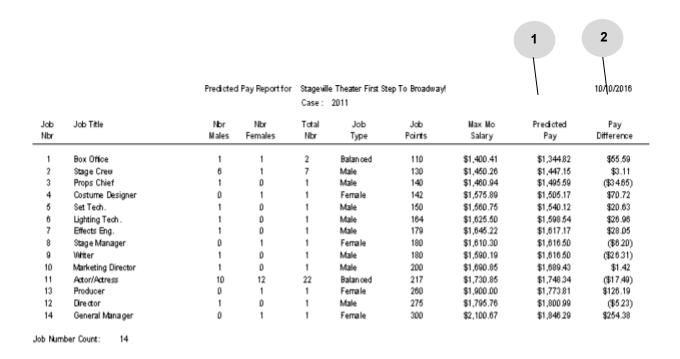

This report can be printed after the results are computed. The predicted pay and pay difference columns are helpful in analyzing the cost of adjusting the salary for any given class.

## 1. Predicted Pay

The most simplistic definition of predicted pay is that it is the average pay of male classes at any given point value. Predicted pay is calculated by averaging the maximum monthly salaries for male classes in the jurisdiction. It is the standard for comparing how males and females are compensated. Predicted pay is a mirror, or reflection, of the current compensation practice within a jurisdiction for male classes, but is not necessarily the salary that "should" be paid at any particular point level. Specific details of the method used to calculate predicted pay is explained in pages eight through 13. The graph on page seven shows a "predicted pay line" and how male and female classes scatter around that line. Predicted pay amounts are determined only from the jurisdiction itself, not from any external factors or salaries.

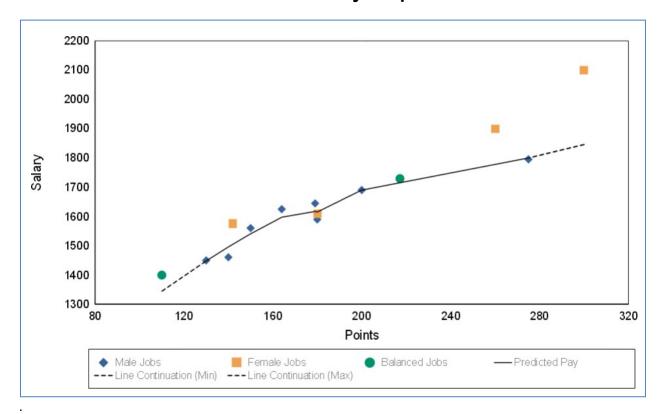

## 2. Pay Difference

Shows the dollar amount that maximum monthly salaries fall above or below predicted pay. If a jurisdiction does not pass the statistical test and needs to increase salaries for female classes, either to reach an underpayment ratio of 80% or eliminate the statistical significance of the t-test, this information is useful in calculating the cost. For example, the cost to increase the female class of "stage manager" to predicted pay would be \$6.20 per month.

## **Predicted Pay Graph**

## **Job Class Data Entry List Report**

Shows the data that has been entered for computation. This report should be carefully reviewed before computing the results. If any errors are found, they must be corrected before computing results.

## Method Used for Predicted Pay Calculation in the Statistical Analysis

The following explanation is a general description of how predicted pay is calculated but does not include all details of the formula in Minnesota Rules Chapter 3920.

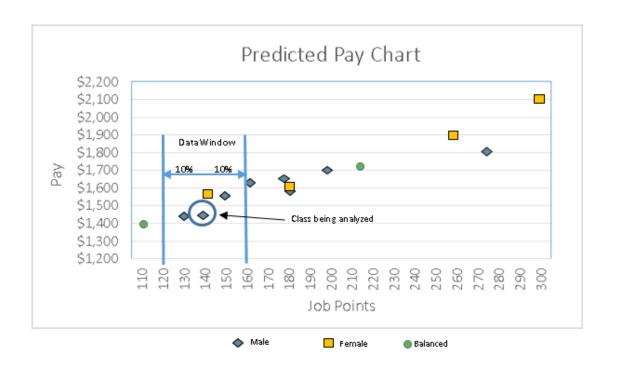

## **Basis of the Statistical Analysis**

The definition in the Local Government Pay Equity Act for equitable compensation relationship says "...compensation for female-dominated classes is not consistently below the compensation for male-dominated classes of comparable value..."

The formula for the statistical analysis is based on three concepts found in the above definition: comparable value, male compensation and consistently below.

## 1. Defining "Comparable Value"

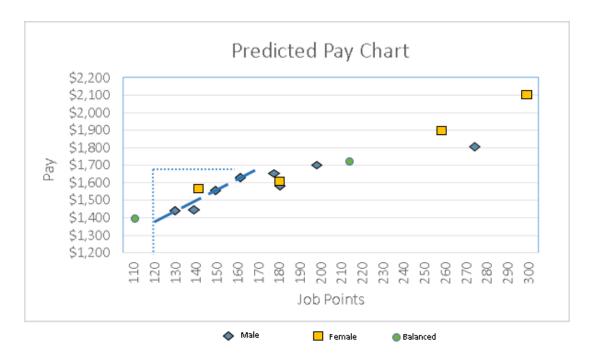

Except for classes in the lower and upper 10% of the point range, comparable value is defined by drawing a 20% window around the job class being analyzed. Each window extends 10% of the range of points on each side of the class. In the example, there is a range of 200 points from lowest to highest, so 10% would be 20 points. Each window must have at least three male classes (two of which have different points) and must include at least 20% of all male classes in the jurisdiction. If this criteria is not met, the window will expand at 5% increments on either side until the required number of male classes are included. The drawing below shows one window for one class.

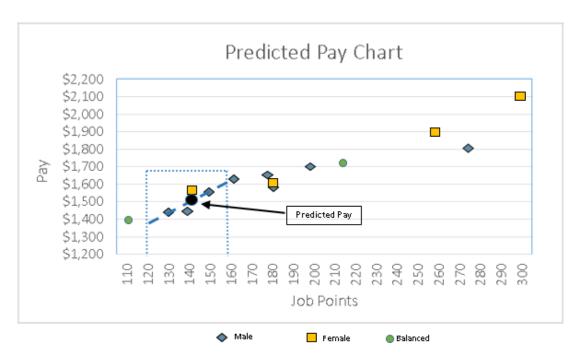

## **II. Defining "Male Compensation" or "Predicted Pay**

A. The first step in defining male compensation is to draw a "mini" regression line through the male classes in the window.

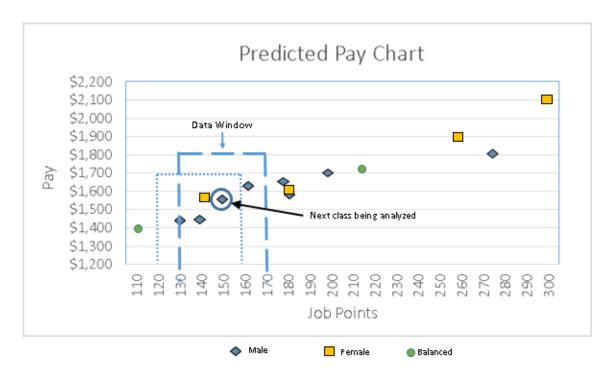

B. The second step in defining male compensation is to look at the class being analyzed and the same point on the mini regression line. This point is called predicted pay.

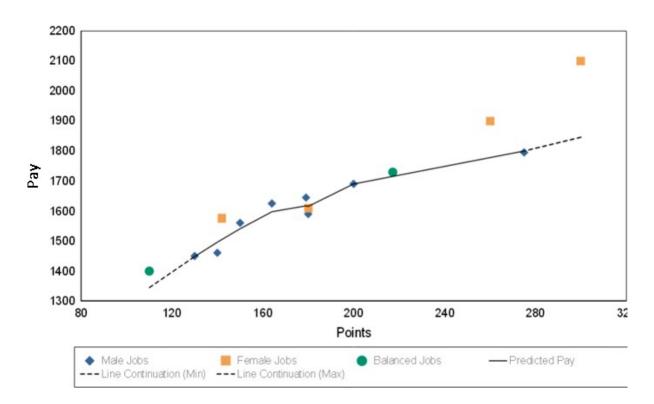

## **III. Defining "Consistently Below"**

- A. A determination is made as to whether the class being analyzed falls above or below predicted pay. In the example, the female class being analyzed is above predicted pay.
- B. A new window is drawn when the next class is analyzed. This continues until all classes have been analyzed.

C. When all the classes have been analyzed, a predicted pay line is drawn.

D. The tabulation of the number of male and female classes above and below the predicted pay line is made.

For example:

E. The percentage of male and female classes below predicted pay is calculated by dividing the number of classes below by the total number of classes in each group.

Female classes: 
$$1 \div 4 = 25.00\%$$
  
Male classes:  $3 \div 8 = 37.50\%$ 

F. The percentage of male classes below predicted pay is divided by the percentage of female classes below predicted pay. This produces the "underpayment ratio."

$$37.50\% \div 25.00\% = 150.00\%$$

G. An underpayment ratio below 80% shows that female classes are compensated "consistently below" male classes of comparable value. If the underpayment ratio is below 80%, further analysis is done to determine if the underpayment of females is statistically significant. Using the t-test, a determination is made whether or not the dollar difference is statistically significant. Details of the t-test can be found on page four.

## **Alternative Analysis Test**

The minimum requirement to pass this test is that:

- a. there is no compensation disadvantage for at least 80% of female classes compared to male classes; or,
- b. compensation differences can be accounted for by years of service or performance.

On the next few pages the four possibilities that exist for inequities or a compensation disadvantage are described.

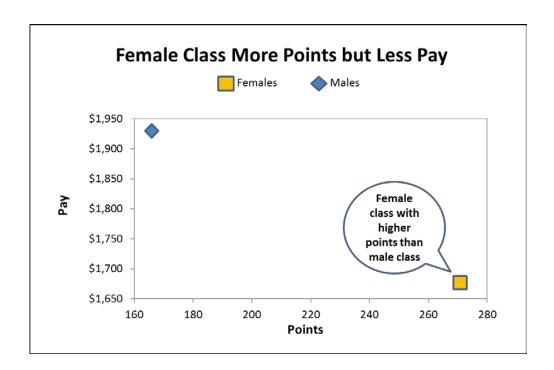

## 1. A female class with higher points has less compensation than a male class with lower points.

**Example:** In this case, the female job class of city clerk has more points but less pay than the male job class of maintenance supervisor.

			Max.
		Class	Monthly
Job Title	<u>Type</u>	<b>Points</b>	Salary
City Clerk	F	275	\$1665
Maint. Sup.	M	171	\$1925

The minimum requirement to correct this inequity is that the female class must have a salary at least equal to that of the male class.

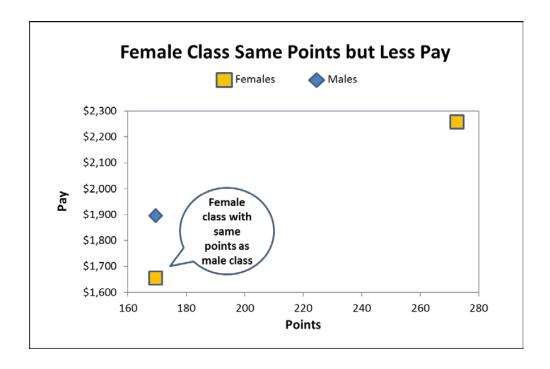

## 2. A female class has the same points as a male class but less compensation.

**Example:** In this case, the female job class of secretary and the male job class of maintenance have the same points but the secretary receives less pay.

			Max.
		Class	Monthly
Job Title	<u>Type</u>	<u>Points</u>	Salary
City Clerk	F	275	\$2265
Maintenance	M	171	\$1900
Secretary	F	171	\$1630

The minimum requirement to correct this inequity is that the female class must have a salary at least equal to the male class.

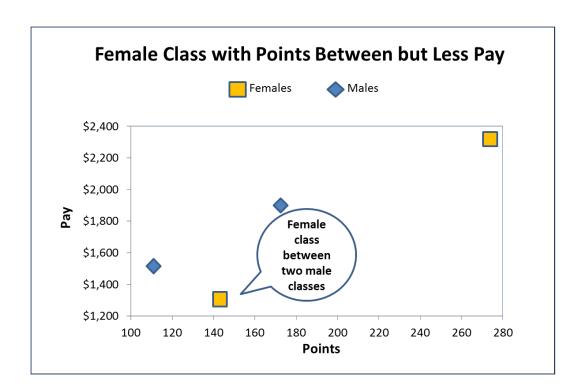

# 3. A female class has points between two male classes but compensation is not between or above the two male classes.

**Example:** In this case, the female job class of receptionist has points between two male classes but receives less pay than either of them.

			Max.
		Class	Monthly
Job Title	<u>Type</u>	<b>Points</b>	Salary
City Clerk	F	275	\$2370
Maintenance	M	171	\$1900
Receptionist	F	141	\$1250
Custodian	M	111	\$1500

The minimum requirement to correct this inequity is that the female class must have a salary somewhere between the two male classes.

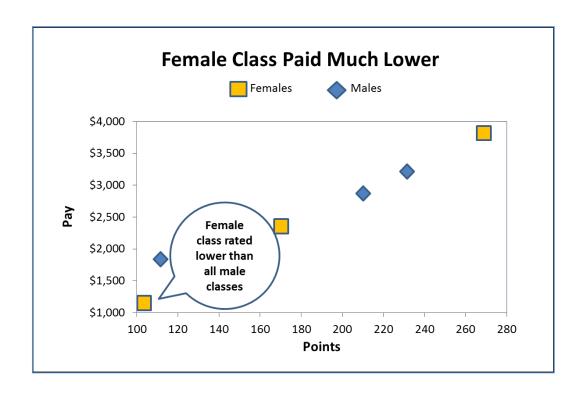

# 4. A female class, rated lower than all male classes, is not compensated as reasonably proportionate to points as other classes.

**Example:** In this case, the retail clerk has a salary of \$700 per month below the custodian but only six fewer points. For all other job classes where there is a salary difference, there is a larger difference in points. For example, the maintenance supervisor's salary is \$300/month less than the police officer and there is a difference of 23 points.

			Max.
		Class	Monthly
Job Title	<u>Type</u>	<b>Points</b>	<u>Salary</u>
City Clerk/Admin	F	275	\$3800
Police Officer	M	236	\$3200
Maintenance Sup	M	213	\$2900
Admin. Sec.	F	173	\$2400
Custodian	M	111	\$1800
Retail Clerk	F	105	\$1100

While some difference in salary is acceptable due to the point difference, the salary for the retail clerk with 105 points must be much closer to the salary for the custodian with 111 points. When there is a question regarding the salary for female class or classes rated lower than all male classes, the judgment is made on a case-by-case basis, and the main considerations are the relationship of points and pay between other classes in the jurisdiction and past history of pay relationships that were previously in compliance. In this case, the minimum requirement to correct this inequity would be that the salary for the retail clerk would be approximately \$1,650/month.

## Salary Range Test

This is an example to show how the salary range test is calculated. It is not necessary to calculate this test manually if the software is being used. If the software is not being used, the following steps will produce a result for this test. Information is recorded for male or female classes only, not balanced classes. The information for this example is taken from the Data Entry List Report on page seven.

JURISDICTION: Stageville Theatre

## Step 1

Look at the "years to max" column and identify male classes with an established number of years to move through a salary range.

Title	Years to Max
Stage Crew	5
Props Chief	5
Set Tech	5
Lighting Tech	6
Effects Tech	6
Writer	6
Marketing Director	4
7 total classes	37 total years

## Step 2

Calculate the average years to reach maximum salary for male classes:

A. Total years from Step 1	37	
B. Total classes from Step 1	<u>7</u>	
C. Divide 2A by 2B	$37 \div 7 = 5.28$	average years to max

## Step 3

Look at the "years to max" column and identify female classes with an established number of years to move through a salary range.

Title	Years to Max
Costume Designer	5
Stage Manager	5
2 total classes	10 total years

## Step 4

Calculate the average years to reach maximum salary for female classes:

A. Total years from Step 3		10	
B. Total classes from Step 3		<u>2</u>	
C. Divide 4A by 4B	$10 \div 2 =$	5	average years to max

## Step 5

Divide 2C by 4C and multiply by 100.  $5.28 \div 5 = 1.05 \times 100 = 105\%$ 

Enter this result in Part C of the Pay Equity Implementation Report.

## **Exceptional Service Pay Test**

This is an example to show how the exceptional service pay test is calculated. It is not necessary to calculate this test manually if the software is being used. If the software is not being used, the following steps will produce a result for this test. The information for this example is taken from the Data Entry List Report on page seven. Information is recorded for male or female classes only, not balanced classes.

## Step 1

Look at the "exceptional service pay" column and calculate the percentage of male classes receiving exceptional service pay.

A. Total number of male classes where an employee receives exceptional service pay.

4

B. Total number of male classes in the jurisdiction.

8

C. Divide 1A by 1B and multiply by 100.

 $4 \div 8 = .50 \times 100$ 

50%

If result of 1C is 20% or less, stop here and check appropriate box in Part D of report form.

If result is more than 20%, go on to Step 2.

## Step 2

Look at the "exceptional service pay" column and calculate the percentage of female classes receiving exceptional service pay.

A. Total number of female classes where an employee receives exceptional service pay.

1

B. Total number of female classes.

4

C. Divide 2A by 2B and multiply by 100.

 $1 \div 4 = .25 \times 100$ 

25%

## Step 3

Calculate the ratio of female/male classes receiving exceptional service pay.

Divide 2C by 1C and multiply by 100.

 $.25 \div .50 = .50 \times 100$ 

50%

## PUBLIC UTILITIES COMMISSION

500 SE FOURTH STREET GRAND RAPIDS, MINNESOTA 55744 TELEPHONE (218) 326-7024 TDD (218) 326-7487 FAX (218) 326-7499

## Memorandum

To: Grand Rapids Public Utilities Commission

From: Julie Kennedy, General Manager

Date: January 8, 2021

Re: Administration Department Report for December

## Office Closure

Our offices will be closed on Monday, January 18 in honor of Martin Luther King, Jr. Day and on Tuesday, January 19 for an employee appreciation day. Customers may use the drop box at the Service Center or the on-line system to make payments on those days.

## <u>Topic of the Month – Governmental Relations</u>

- Both our state and national legislative conferences will be held virtually this year at no cost. We
  will display the conferences in our conference room which can safely accommodate 10
  individuals. With registration, you may view the conferences individually from the location of
  your choice. Commissioners may contact me if they are interested in either attending in the
  conference room or having us register them individually.
  - o MMUA Legislative Conference 9am to noon Wednesday, February 10
  - o APPA Legislative Rally 10am to 5pm Monday & Tuesday, March 1 & 2

## **Staffing**

• Business Services Manager confirmation of hire on consent agenda, to begin employment in February.

## **Community Involvement**

- Continue work with local officials on COVID-19 vaccination distribution planning for our area
- GR Government Affairs and ItasCAP meetings with local industry and legislative updates
- Provided the MMUA Tom Bovitz Memorial Scholarship Program Application info to GRHS

## **Projects Performed Last Month**

- Attended the MP municipal customer meeting
- Hiring process for the Electric Lineworker position and Business Services Manager position
- Prepared record retention and document destruction procedures

## **Projects Performed This Month**

- Continue working on position description updates, and staffing hires and transitions.
- Attend the NEMMPA Board member meeting see attached minutes from November meeting
- Continue review of wastewater treatment costs and contracts with UPM Blandin

## NEMMPA

# Northeastern Minnesota Municipal Power Agency Board Meeting

Minutes of the Northeastern Minnesota Municipal Power Agency (NEMMPA) Board Meeting held on November 18, 2020 at 11:00 a.m. via MS Teams.

## 1. Call Meeting to Order

The meeting was called to order by President French at 11:00 a.m.

## Attendees:

President Greg French, Virginia

Secretary Julie Kennedy, Grand Rapids

Board Member Dave Cluff, Aitkin

Board Member Harold Langowski, Ely

Board Member Jean Lane and Alternate Member Dan Chase, Hibbing

Member Representative Craig Wainio, Mountain Iron

Member Representative Carol Lind and Alternate Member Char Jones, Proctor

Member Representative Bob O'Tremba and Alternate Member Dave Fischer, Pierz

Member Representative Matt Pantzke, Randall

Consultant Gary Cerkvenik, Costin Group

Consultant Dave Berg, Dave Berg Consulting

#### **Board Members Absent:**

Vice President Scott Magnuson, Brainerd

Board Member Dan Walker, Two Harbors

## 2. Approve Agenda

Motion by H. Langowski, supported by J. Lane, to approve the agenda. MCU

## 3. Approve Minutes from June 2020 Board Meeting

Motion by C. Lind, supported by C. Wainio, to approve the Minutes from the August 19, 2020 Board meeting. MCU

## 4. Treasurer's Report

President G. French reported 2021 dues will be sent out in January.

## 5. Dave Berg Consulting Status Update

D. Berg reported he'd held meetings with nearly all member communities. Next steps include developing a Request For Information (RFI) to solicit potential interest from wholesale providers and to have a conversation with MP VP of Customer Experience letting them know about the RFI.

## 6. Solar Development Update

President G. French reported VPU is working with MP and Consultant G. Cerkvenik on a potential solar project. Secretary J. Kennedy reported GRPU signed agreements with MP on a 2 MW, 2.5MW-Hr Solar Plus Battery Storage Project.

## 7. Open Discussion/Around the Horn

Members discussed their individual projects/situations.

## 8. Adjourn

Motion by C. Wainio, supported by B. O'Tremba, to adjourn the meeting at 12:20 p.m. MCU

The next regularly scheduled meeting of the NEMMPA Board of Directors is at 11 am on January 20, 2021 via MS Teams.

## **ELECTRIC DEPARTMENT MONTHLY REPORT January 2021 Commission Meeting**

#### <u>Safety</u>

There were no OSHA recordable accidents this month.

#### **Topic of the Month**

- Solar Plus Storage systems
  - Our planned solar plus storage system will be 2 MW AC solar with a 1 MW, 2.09 MW-hour battery storage system
  - o Located near airport, requires 6-8 acres of land per MW
  - o Single axis tracking system: allows for panels to track sun to allow for 90 degree alignment to sun
  - First usable solar panel Bell Laboratories in 1954, first used by space industry in 1950s, became more prevalent in commercial and residential use in past 20 years.
  - Solar panels create DC power through photovoltaic effect when sunlight excites semiconductor region creating movement of electrons, requires conversion to AC power using invertors
  - Battery Storage system: commonly installed within large conex box, most likely 2 to 3 containers for GRPU system
  - Battery storage system: becoming more popular to allow for fluctuations in power generation in larger solar and wind sites. Eliminates black out issues caused by weather events. Example: Kern County, California: 1118 MW solar plus 2165 MW-hrs battery storage system planned to start construction in 2021. In the past these sites would be solar only.
  - Growth of lithium-ion battery technology driven by electric vehicles and consumer electronics is also driving battery storage technology

## **Demand Threshold and Power Usage for past month**

• The attached graph shows the system load with demand threshold for the past month.

## **Reliability Last Month**

• The attached eReliability report shows that we had 1 outage during the month.

## **Projects Performed Last Month**

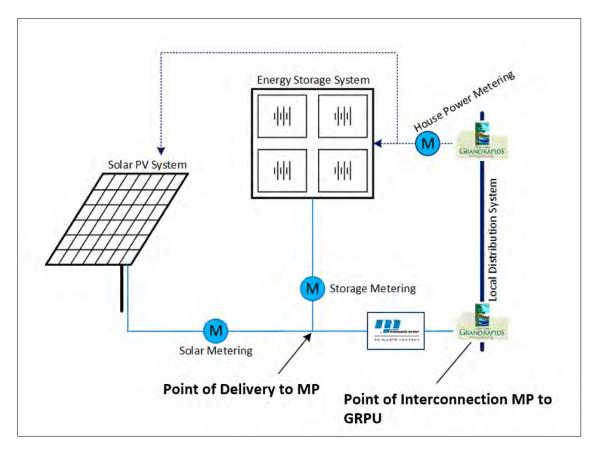

- Electric vehicle seminars
- Year-end service work
- Community solar garden site grading, interconnection design

#### **Projects Scheduled for This Month**

- 2021 project planning
- Training electric rubber gloving, electrician continuing ed, distribution design workshop
- Substation and system maintenance

## WATER & WASTEWATER DEPARTMENT MONTHLY REPORT January 2021 Commission Meeting

## **Safety**

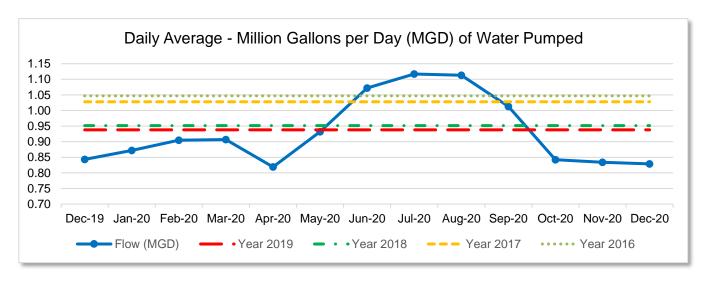

There were no OSHA recordable accidents this month.

## **Topic of the Month**

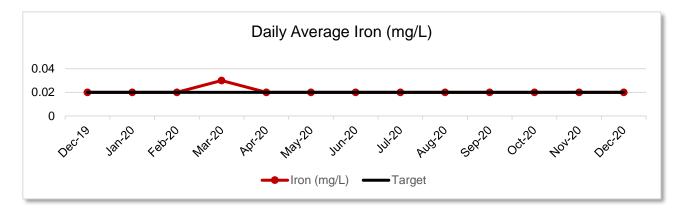

Super-oxygenation project update.

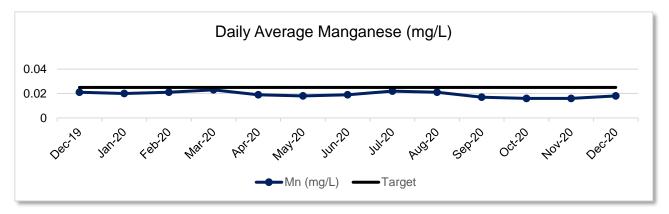

## WTP Operations

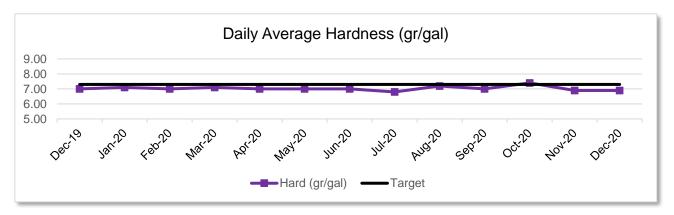

The water plant pumped an average of 0.83 million gallons of water per day (MGD) with a peak of 0.98 million gallons during last month.

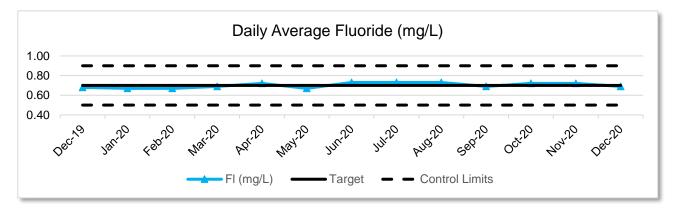

Phone: 218-326-7024 • Fax: 218-326-7499 • www.grpuc.org

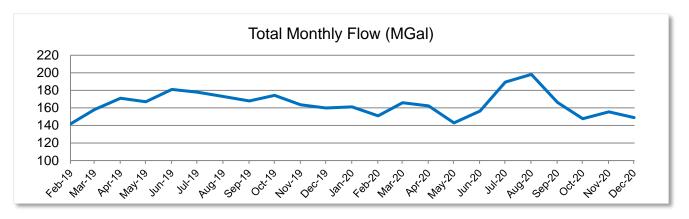

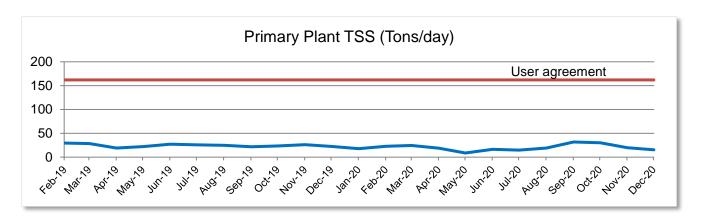

## **WWTP Operations**

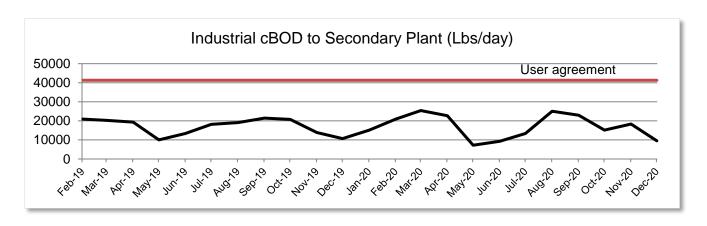

The Wastewater Treatment Plant (WWTP) met all National Pollutant Discharge Elimination System (NPDES) permit requirements last month. We treated 149 million gallons of water removing 99.7% of the Total Suspended Solids (TSS) and 98.1% Biochemical Oxygen Demand (cBOD).

	Design Limits (monthly AVG)	Actual Results
Primary Plant		
Flow (MGD)	13.25	3.6
TSS (Tons/day)	162	15.5
TSS Peak (Tons/Day)	284	51.7

	Design Limits (monthly AVG)	Actual Results
Secondary Plant		
Flow (MGD)	15.25	4.8
cBOD (lbs/Day)	41,300	11,768
Peak cBOD (lbs/Day)	57,350	29,507
Zinc-weekly (ug/L)	418	177
% GRPUC		30.0%

	Permit Limits (monthly AVG)	Actual Results
<u>Effluent</u>		
TSS (mg/L) - monthly average	30	1.0
cBOD (mg/L) – monthly average	25	2.3
Dissolved Oxygen (mg/L)	>1.0	9.6

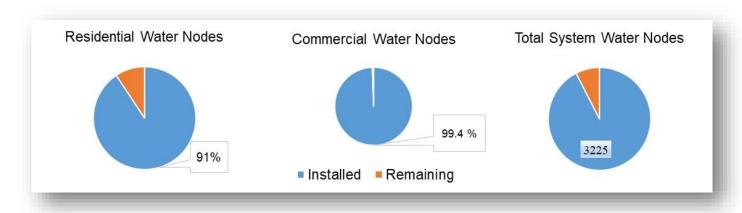

## **Sludge Landfill Operations**

- 0.592 million gallons of leachate were hauled last month
- 2,544 cubic yards of sludge solids were hauled to the landfill

## **AMI Water Install Last Month**

We installed 0 water nodes and/or meters in residential routes due to Covid-19 executive orders. We remain at 3225 (92%) active water nodes installed in the system.

## **Projects Performed Last Month**

- Emergency repair to buried WWTP secondary plant airline.
- Changed out WWTP aeration basin A1-1 aerator.
- Replaced faulty WTP filter effluent valve.

## **Projects Scheduled for This Month**

- Super-Oxygenation capex project mechanical and electrical installation.
- PLC replacement for leachate loadout station 1
- Well house annual maintenance
